EXP 10

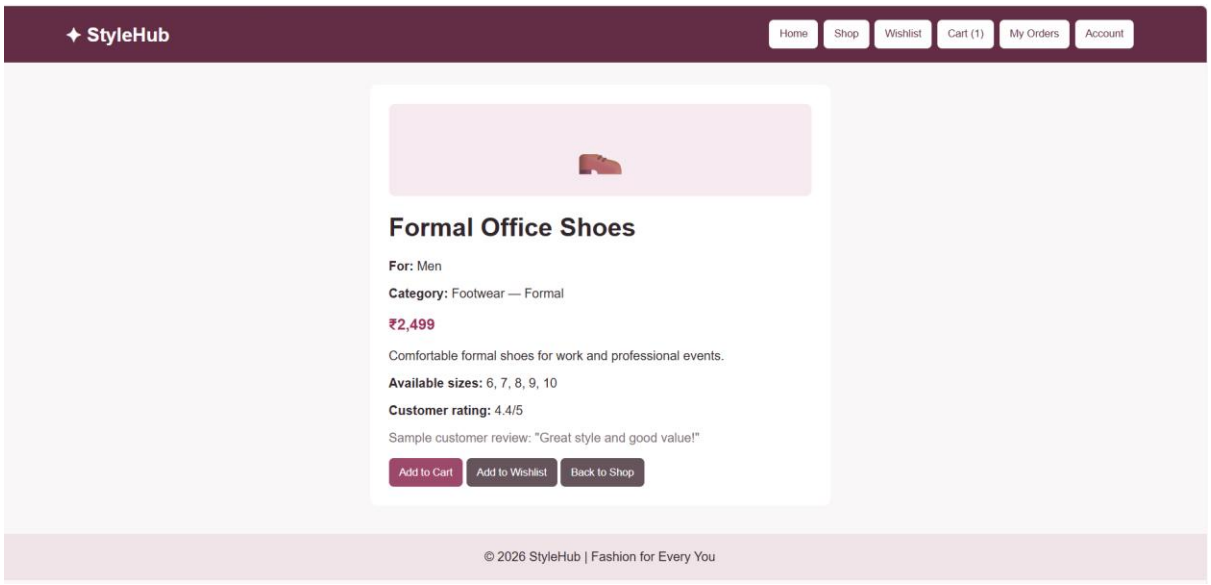

StyleHub, a premier online fashion retailer, introduces its comprehensive e-commerce platform designed to cater to fashion enthusiasts. The website offers an extensive collection of clothing, footwear, and accessories for men, women, and children,

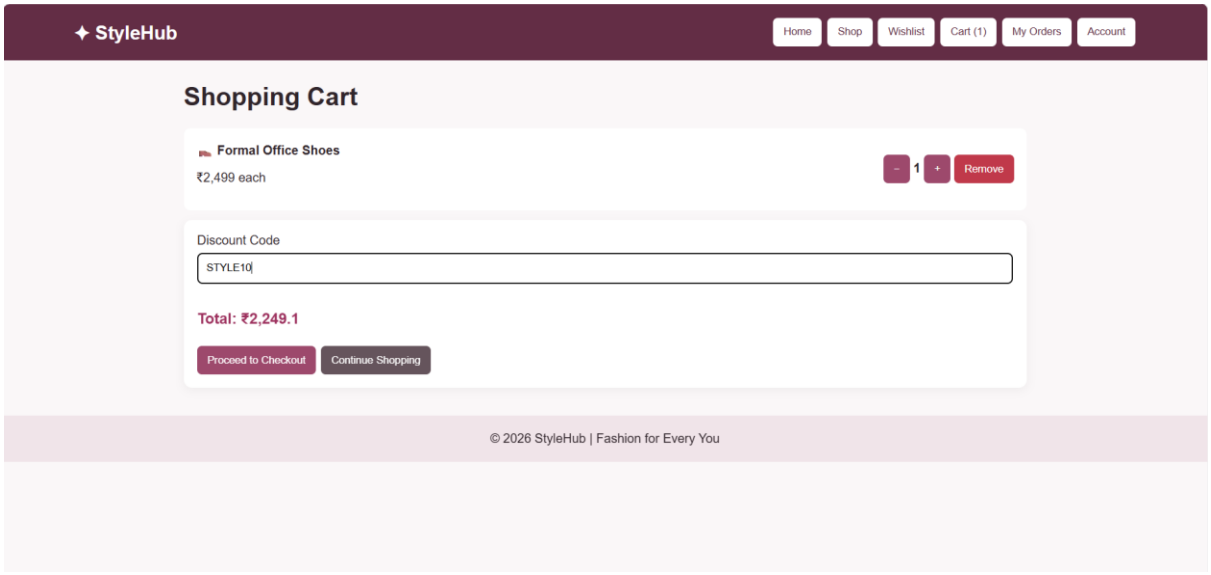

with categories such as casual wear, formal attire, and seasonal collections. Key functionalities include user registration and login, advanced search and filtering options,

detailed product descriptions with high-resolution images, customer reviews, and size guides. The platform supports secure payment methods, order tracking, and an easy return and exchange policy. Customers can create wish lists, receive personalized style recommendations, and enjoy exclusive online discounts and flash sales. StyleHub aims to provide a seamless and enjoyable shopping experience, keeping users up-to-date with

the latest fashion trends.The core of an online shop is the product catalogue and the cart. The users browse products which are grouped in categories and add the desired ones to the cart. Next, there is transaction handling, which in its simplest form consists in the order being sent via e-mail to the seller, but most often it takes the whole buying process through separate order statuses.
