EXP 9

TechSavvy, a leading retailer of electronic gadgets, has launched an online shopping platform to provide customers with a seamless and convenient shopping experience. The website features a wide range of products, including smartphones, laptops, tablets, and accessories, all categorized for easy browsing. Key functionalities include user registration and login, product search and filtering, detailed product descriptions and reviews, secure payment options, and order tracking. Customers can add items to their cart, create wish lists, and receive personalized recommendations based on their browsing and purchase history. The platform also offers exclusive online discounts and promotions, ensuring customers get the best deals on the latest gadgets.The core of an online shop is the product catalogue and the cart. The users browse products which are grouped in categories and add the desired ones to the cart. Next, there is transaction handling, which in its simplest form consists in the order being sent via e-mail to the seller, but most often it takes the whole buying process through separate order statuses.
